

Disabled Compliant Washroom Mirror

INSTALLATION INSTRUCTIONS

Congratulations! You have just purchased one of the premium products from 3monkeez washroom accessories range. Proudly manufactured to Australian Standards

Model: WA-MIR-DC

450mm Wide x 1000mm High

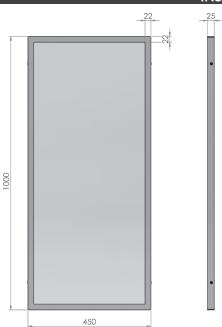

IMPORTANT INFORMATION

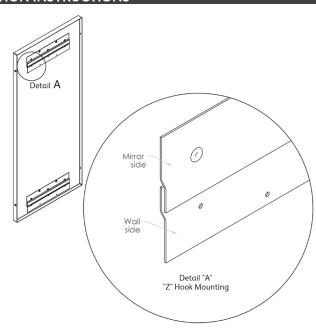

Note: Please follow the below procedures. If the below procedures are not followed it may impact the life of some components and void warranties.

- It is recommended that this product be installed by a licensed tradesperson.
- Installation height and location may be subject to Australian Building Code Regulations.
- This product may also be subject to height and location conditions to comply with AS1428.1 for accessibility.
- Placement may be subject to architects specification and drawings.
- It is the responsibility of the installer to fix the washroom accessory in the correct position.
- Depending on the model, fixings and wall anchors may not be included with this product.

INSTALLATION INSTRUCTIONS

- 1. Using the integrated "Z-hook" mounting brackets, locate height on wall and mark fixing holes, ensuring unit is level and even.
- 2. Drill holes, fit wall plugs and loosely secure mounting brackets to wall surface using appropriate fixings.
- 3. Check fixings are level and securely tighten fixings.
- 4. Place mirror onto mounting brackets, draw down against wall surface to firmly secure in place to finish installation. Fasten the unit to the wall.
- To achieve a theft resistant fixing, run a bead of silicone over the wall mounting brackets and mirror bracket prior to attaching the mirror to the wall brackets.
- For sufficient space to lift mirror onto wall mounting brackets, leave a minimum clearance of 25mm above the top of the mirror frame
- For sufficient space to remove the mirror from the wall, leave a minimum of 25mm clearance at the bottom of the mirror, and a minimum of 13mm either side of the mirror.

STAINLESS STEEL MAINTENANCE AND CLEANING INSTRUCTIONS

Stainless steel products must be cleaned on a regular basis to maintain the ability to resist corrosion.

Cleaning stainless steel products is an easy task when done regularly:

- Clear away all food and water from the surface with a microfiber cloth or soft sponge; don't use abrasive materials that cause scratching.
- Once cleared of debris, go over the surface with a food safe stainless steel cleaner, bicarb soda or mild detergent and water. The best chemicals for stainless steel contain alkaline and don't have chloride in them.
- To remove stubborn stains, use a good quality stainless steel cleaner and non abrasive cloth
- · Rinse thoroughly with clean fresh water
- Drying the product with a soft, dry absorbent cloth will prevent mineral deposits building up on the surface of the product.
- Once dry, use a food safe stainless steel or metal polish.
- Follow the grain of the metal to ensure the best results and to avoid further damage to the surface.
- Always keep the product clean and dry when not in use.
- Don't leave anything citric on the product as it can etch the surface over time.
- Don't leave soaps and other cleaners on your stainless steel product overnight.
- Don't leave damp sponges or cloths on the inside or edge of the product when not in use.

TIP - Cleaning your stainless steel equipment after each use as above will ensure the product remains in good condition.
