

Congratulations on your purchase of a premium commercial tapware product from 3monkeeZ.  
Our products have been tested and are manufactured to AS 3718.

### SCOPE OF APPLICATION

T-3M3006-SO - 6" Standard Spout  
T-3M3007G-SO - 7" Gooseneck Spout

T-3M3008-SO - 8" Standard Spout  
T-3M3012G-SO - 12" Gooseneck Spout

T-3M3012-SO - 12" Standard Spout

### IMPORTANT INFORMATION

Note: Please follow the below procedures. If the below procedures are not followed it may impact the life of some components and void warranties.

- Tap ware must be installed by a qualified plumber in accordance with the Plumbing Code of Australia (PCA), AS/NZS3500 and the Manufacturer's instructions
- All pipework must be thoroughly flushed to remove any debris prior to installation as foreign materials may cause damage to internal parts and affect performance.
- This products complies with the Lead Free requirements of the National Construction Code Volume Three

### INSTALLATION INSTRUCTIONS

#### Step 1

Unpack the spout, make sure no damage is present.

#### Step 2

Apply grease to the spout o rings and install spout in to tap body, taking care to not move or damage the o rings. Tighten nut. Ensure aerator on spout is tight.

#### Step 3

Turn on water supply. Check for any leaks and check functionality of spout.

### TECHNICAL INFORMATION

Connection	3/4" FI BSP
Working Pressure Range	150kPa - 500kPa

### STAINLESS STEEL MAINTENANCE AND CLEANING INSTRUCTIONS

Stainless steel products must be cleaned on a regular basis to maintain the ability to resist corrosion. The surface of stainless steel has a protective layer that creates a protective shield against oxidation; which makes it durable and long lasting. Protecting this layer is important to ensure the longevity of this product.

Cleaning stainless steel products is an easy task when done regularly:

- Clear away all debris from the surface with a microfiber cloth or soft sponge; don't use abrasive materials.
  - Once cleared of debris, go over the surface with a food safe stainless steel cleaner, bicarb soda or mild detergent and water. The best chemicals for stainless steel contain alkaline and don't have chloride in them.
  - To remove stubborn stains, use a good quality stainless steel cleaner and non abrasive cloth.
  - Rinse thoroughly with clean fresh water.
  - Towel dry the product with a soft dry absorbent cloth after cleaning and use.
  - Once dry, use a food safe stainless steel or metal polish. Follow the grain of the metal to ensure the best results and avoid damage.
  - Always keep the product clean and dry when not in use.
  - Don't leave anything citric on the product as it can etch the surface over time.
  - Don't leave soaps and other cleaners on your stainless steel product overnight or damp sponges/cloths on of the product when not in use.
- TIP - Cleaning your stainless steel equipment after each use as above will ensure the product remains in good condition.

### CARTON CONTENTS - 1x Spout

V1.0 - 30/11/2023
